OTC-12 | MANAGEMENT SYSTEMS

ISO 9001 Quality Management & Internal Audit

SUGGESTED DURATION: 2 DAYS | IN-COMPANY / LIVE ONLINE

Apply quality management to daily work rather than treating it as a documentation exercise. Participants connect process risks, operational controls, evidence and corrective action.

WHO SHOULD ATTEND

Quality managers, process owners, internal auditors, engineers, supervisors and management representatives.

WHAT PARTICIPANTS WILL BE ABLE TO DO

- Interpret quality management requirements in the context of plant and support processes.
- Plan an internal audit and collect objective evidence.
- Write clear findings and evaluate corrective-action effectiveness.

SUGGESTED PROGRAMME OUTLINE

Day 1 | Process-based quality management

Context and interested parties; leadership and responsibilities; process mapping and risk-based thinking; competence and documented information; operational controls, supplier quality and performance measures.

Day 2 | Internal audit and improvement

Audit objectives, scope and criteria; sampling, interviews and records; evidence-based findings and nonconformity writing; corrections, cause analysis and corrective action; management review and follow-up.

OTC-12 | PRACTICAL APPLICATION & DELIVERY

ISO 9001 Quality Management & Internal Audit

PRACTICAL WORKSHOPS

Audit a maintenance process

Map inputs, outputs, risks and controls; prepare questions and identify objective evidence.

Write a defensible finding

Review an evidence pack and draft the requirement, evidence and nonconformity statement; assess the proposed action.

PARTICIPANT TOOLS AND TAKEAWAYS

Process map worksheet; audit plan; audit checklist structure; finding and corrective-action templates.

HOW LEARNING IS DELIVERED AND ASSESSED

Facilitated explanations, worked examples, case discussions and small-group exercises. A short baseline check establishes starting knowledge; a closing knowledge check and practical review assess learning. Assessment can be adapted for operators, technicians or experienced engineers.

CUSTOMISATION AND CLIENT INPUTS

Client process map, procedures and anonymised audit examples. The applicable ISO edition and audit criteria will be agreed for delivery; the course is not third-party certification.

The agenda is indicative. Final content, duration, batch size, language and delivery arrangements are agreed after a training-needs discussion. Online delivery uses document reviews, calculations, role-play and case exercises; physical demonstrations require separate site arrangements.

FACILITATOR

Prem Prakash Mishra | Mechanical engineer, advisor and corporate trainer. Brings 39 years of career experience across Kuwait Oil Company, IPCL and NTPC, spanning projects, commissioning, maintenance, reliability, asset integrity and industrial audits. Specialist inputs, where needed, are agreed in the proposal.

COMPLETION AND FOLLOW-UP

An Omtech Corporation participation or completion certificate may be provided under the agreed assessment arrangements. This is company training, not an accredited professional qualification or a guarantee of certification. Post-training support is available with scope and duration agreed in the proposal.
