OTC-05 | ENGINEERING & PROJECTS

Technical Procurement, Specifications & Bid Evaluation

SUGGESTED DURATION: 2 DAYS | IN-COMPANY / LIVE ONLINE

Learn to define a clear technical requirement and compare supplier offers on a consistent basis. Pump-package examples show how omissions and unresolved deviations become delivery or operating problems.

WHO SHOULD ATTEND

Procurement and package engineers, project engineers, maintenance engineers, technical buyers and vendor coordinators.

WHAT PARTICIPANTS WILL BE ABLE TO DO

- Prepare the structure of a datasheet, technical specification and material requisition.
- Separate mandatory requirements, preferences, exclusions and vendor deviations.
- Write traceable technical queries and a defensible bid recommendation.

SUGGESTED PROGRAMME OUTLINE

Day 1 | Define an enquiry that suppliers can answer

Duty cases, battery limits and interface responsibilities; datasheet fields and applicable project requirements; package scope, inspection, testing, documentation, guarantees and spares; requisition completeness review.

Day 2 | Evaluate and recommend

Offer compliance matrix; clarification cycles and equal information to bidders; technical deviations and residual risks; lifecycle cost inputs; technical recommendation, purchase handover and vendor document follow-up.

OTC-05 | PRACTICAL APPLICATION & DELIVERY

Technical Procurement, Specifications & Bid Evaluation

PRACTICAL WORKSHOPS

Pump-package enquiry review

Find scope gaps in an illustrative requisition including driver, seals, relief protection, testing and installation responsibilities.

Three-offer evaluation

Compare fictional supplier offers, prepare technical queries and write a recommendation with qualifications and open issues.

PARTICIPANT TOOLS AND TAKEAWAYS

Datasheet completeness checklist; technical query log; TBE matrix; deviation register; recommendation template.

HOW LEARNING IS DELIVERED AND ASSESSED

Facilitated explanations, worked examples, case discussions and small-group exercises. A short baseline check establishes starting knowledge; a closing knowledge check and practical review assess learning. Assessment can be adapted for operators, technicians or experienced engineers.

CUSTOMISATION AND CLIENT INPUTS

Anonymised enquiry specification and supplier offers where available. Commercial negotiation, statutory design approval and final engineering calculations remain separate assignments.

The agenda is indicative. Final content, duration, batch size, language and delivery arrangements are agreed after a training-needs discussion. Online delivery uses document reviews, calculations, role-play and case exercises; physical demonstrations require separate site arrangements.

FACILITATOR

Prem Prakash Mishra | Mechanical engineer, advisor and corporate trainer. Brings 39 years of career experience across Kuwait Oil Company, IPCL and NTPC, spanning projects, commissioning, maintenance, reliability, asset integrity and industrial audits. Specialist inputs, where needed, are agreed in the proposal.

COMPLETION AND FOLLOW-UP

An Omtech Corporation participation or completion certificate may be provided under the agreed assessment arrangements. This is company training, not an accredited professional qualification or a guarantee of certification. Post-training support is available with scope and duration agreed in the proposal.
