OTC-08 | RELIABILITY & MAINTENANCE

Maintenance Planning, Scheduling & CMMS Discipline

SUGGESTED DURATION: 3 DAYS | IN-COMPANY / LIVE ONLINE

Improve the quality of work from notification to closure. The programme links clear job scopes, material readiness, safe execution and useful equipment history.

WHO SHOULD ATTEND

Maintenance planners, schedulers, supervisors, operations coordinators and engineers using SAP or other CMMS platforms.

WHAT PARTICIPANTS WILL BE ABLE TO DO

- Separate planning, scheduling, execution and close-out responsibilities.
- Develop job packs with resources, materials, permits and acceptance checks.
- Use meaningful backlog and schedule measures to improve work delivery.

SUGGESTED PROGRAMME OUTLINE

Day 1 | Work identification and prioritisation

Notifications and work orders; risk-based priority; asset hierarchy and equipment history; backlog screening; emergency versus planned work; roles and planning inputs.

Day 2 | Job planning and readiness

Scope, task sequence, labour and duration estimates; tools, spares and services; permit/isolation interfaces; quality hold points; job-pack review and readiness gates.

Day 3 | Scheduling, execution and learning

Weekly scheduling with operations; resource loading and break-in work; progress and handover; technical completion and failure coding; schedule compliance, planned work and backlog health.

OTC-08 | PRACTICAL APPLICATION & DELIVERY

Maintenance Planning, Scheduling & CMMS Discipline

PRACTICAL WORKSHOPS

Plan a pump overhaul

Prepare a job pack including scope, spares, skills, safety interfaces, quality checks and return-to-service requirements.

Weekly schedule negotiation

Role-play operations and maintenance priorities with limited resources; record trade-offs and reasons for deferral.

PARTICIPANT TOOLS AND TAKEAWAYS

Job-plan template; readiness checklist; weekly scheduling board; work-order close-out guide; KPI definition sheet.

HOW LEARNING IS DELIVERED AND ASSESSED

Facilitated explanations, worked examples, case discussions and small-group exercises. A short baseline check establishes starting knowledge; a closing knowledge check and practical review assess learning. Assessment can be adapted for operators, technicians or experienced engineers.

CUSTOMISATION AND CLIENT INPUTS

Client work-order samples and planning workflow. CMMS concepts are platform-neutral; software configuration and licensed system access are not included.

The agenda is indicative. Final content, duration, batch size, language and delivery arrangements are agreed after a training-needs discussion. Online delivery uses document reviews, calculations, role-play and case exercises; physical demonstrations require separate site arrangements.

FACILITATOR

Prem Prakash Mishra | Mechanical engineer, advisor and corporate trainer. Brings 39 years of career experience across Kuwait Oil Company, IPCL and NTPC, spanning projects, commissioning, maintenance, reliability, asset integrity and industrial audits. Specialist inputs, where needed, are agreed in the proposal.

COMPLETION AND FOLLOW-UP

An Omtech Corporation participation or completion certificate may be provided under the agreed assessment arrangements. This is company training, not an accredited professional qualification or a guarantee of certification. Post-training support is available with scope and duration agreed in the proposal.
