**OTC-13 | MANAGEMENT SYSTEMS**

# Environmental Management & ISO 14001 Internal Audit

**SUGGESTED DURATION: 2 DAYS | IN-COMPANY / LIVE ONLINE**

Develop an audit approach that connects environmental aspects, compliance obligations and operating controls with the evidence available at the workplace.

## WHO SHOULD ATTEND

EHS personnel, environmental coordinators, internal auditors, operations engineers and departmental process owners.

## WHAT PARTICIPANTS WILL BE ABLE TO DO

- Identify environmental aspects and evaluate their significance using client criteria.
- Examine compliance evaluation, operational control and emergency preparedness evidence.
- Prepare an internal audit plan and improvement actions.

## SUGGESTED PROGRAMME OUTLINE

### Day 1 | Environmental system in plant practice

Context and scope; aspects and impacts; compliance obligations register; objectives and responsibilities; operational controls, contractor interfaces, competence and environmental emergencies.

### Day 2 | Audit and continual improvement

Monitoring and measurement; compliance evaluation evidence; audit planning and sampling; workplace observations and records; findings, corrective actions, management review and effectiveness checks.

**OTC-13 | PRACTICAL APPLICATION & DELIVERY**

# Environmental Management & ISO 14001 Internal Audit

## PRACTICAL WORKSHOPS

### Aspect-impact workshop

Review a maintenance workshop and utility system; identify aspects, impacts, existing controls and data needed to rate significance.

### Environmental audit simulation

Evaluate sample waste, spill and monitoring records; prepare questions, findings and follow-up actions.

## PARTICIPANT TOOLS AND TAKEAWAYS

Aspect-impact worksheet; compliance evidence checklist; audit plan; environmental corrective-action tracker.

## HOW LEARNING IS DELIVERED AND ASSESSED

Facilitated explanations, worked examples, case discussions and small-group exercises. A short baseline check establishes starting knowledge; a closing knowledge check and practical review assess learning. Assessment can be adapted for operators, technicians or experienced engineers.

## CUSTOMISATION AND CLIENT INPUTS

Client aspect register and environmental procedures. Statutory interpretations, laboratory analysis and specialist treatment chemistry are separate from this management-system training.

The agenda is indicative. Final content, duration, batch size, language and delivery arrangements are agreed after a training-needs discussion. Online delivery uses document reviews, calculations, role-play and case exercises; physical demonstrations require separate site arrangements.

## FACILITATOR

Prem Prakash Mishra | Mechanical engineer, advisor and corporate trainer. Brings 39 years of career experience across Kuwait Oil Company, IPCL and NTPC, spanning projects, commissioning, maintenance, reliability, asset integrity and industrial audits. Specialist inputs, where needed, are agreed in the proposal.

## COMPLETION AND FOLLOW-UP

An Omtech Corporation participation or completion certificate may be provided under the agreed assessment arrangements. This is company training, not an accredited professional qualification or a guarantee of certification. Post-training support is available with scope and duration agreed in the proposal.
