OTC-14 | MANAGEMENT SYSTEMS

Occupational Health & Safety Management: ISO 45001

SUGGESTED DURATION: 2 DAYS | IN-COMPANY / LIVE ONLINE

Connect the occupational health and safety management system with workplace hazards, worker participation and practical operating controls.

WHO SHOULD ATTEND

HSE professionals, internal auditors, supervisors, operations and maintenance engineers, worker representatives and process owners.

WHAT PARTICIPANTS WILL BE ABLE TO DO

- Relate hazard identification and risk controls to work activities and responsibilities.
- Review worker consultation, competence, incident learning and emergency preparedness.
- Collect audit evidence and write clear OH&S findings.

SUGGESTED PROGRAMME OUTLINE

Day 1 | OH&S system and workplace control

Scope, leadership and worker participation; hazards, risks and opportunities; compliance obligations; hierarchy of controls; procurement/contractor interfaces; competence, change and emergency preparedness.

Day 2 | Audit, incidents and improvement

Monitoring and compliance evaluation; audit planning and interviews; observation of work controls; incident investigation and corrective action; management review and follow-up; mock audit.

OTC-14 | PRACTICAL APPLICATION & DELIVERY

Occupational Health & Safety Management: ISO 45001

PRACTICAL WORKSHOPS

Hazard-to-control review

Use an illustrative maintenance job to identify hazards, evaluate controls and define who verifies readiness.

OH&S audit role-play

Interview a supervisor, review permit and competence evidence and write findings with appropriate follow-up.

PARTICIPANT TOOLS AND TAKEAWAYS

Hazard/control review worksheet; OH&S audit plan; evidence checklist; finding and action templates.

HOW LEARNING IS DELIVERED AND ASSESSED

Facilitated explanations, worked examples, case discussions and small-group exercises. A short baseline check establishes starting knowledge; a closing knowledge check and practical review assess learning. Assessment can be adapted for operators, technicians or experienced engineers.

CUSTOMISATION AND CLIENT INPUTS

Client hazard register, procedures and selected incident/audit records. This is internal management-system training, not an accredited lead-auditor qualification.

The agenda is indicative. Final content, duration, batch size, language and delivery arrangements are agreed after a training-needs discussion. Online delivery uses document reviews, calculations, role-play and case exercises; physical demonstrations require separate site arrangements.

FACILITATOR

Prem Prakash Mishra | Mechanical engineer, advisor and corporate trainer. Brings 39 years of career experience across Kuwait Oil Company, IPCL and NTPC, spanning projects, commissioning, maintenance, reliability, asset integrity and industrial audits. Specialist inputs, where needed, are agreed in the proposal.

COMPLETION AND FOLLOW-UP

An Omtech Corporation participation or completion certificate may be provided under the agreed assessment arrangements. This is company training, not an accredited professional qualification or a guarantee of certification. Post-training support is available with scope and duration agreed in the proposal.
