OTC-21 | SAFETY & WORKFORCE DEVELOPMENT

Industrial Fire Safety & Emergency Preparedness

SUGGESTED DURATION: 2 DAYS | IN-COMPANY / LIVE ONLINE

Understand industrial fire hazards, protection-system readiness and coordinated emergency response. Practical reviews focus on prevention, impairment management and reliable inspection routines.

WHO SHOULD ATTEND

Plant supervisors, maintenance and operations engineers, HSE personnel, emergency coordinators and facility managers.

WHAT PARTICIPANTS WILL BE ABLE TO DO

- Recognise common fire scenarios and the purpose of detection and protection layers.
- Identify routine checks and deficiencies requiring specialist escalation.
- Develop a coordinated preparedness and improvement action plan.

SUGGESTED PROGRAMME OUTLINE

Day 1 | Hazards and protection systems

Fire and explosion fundamentals; ignition sources and prevention; fire classes and extinguishing principles; alarms, detectors, firewater, hydrants, deluge and foam awareness; equipment access and impairment reporting.

Day 2 | Readiness and response

Inspection/testing/maintenance responsibilities; fire pump and firewater readiness concepts; alarm response and evacuation; emergency roles, communication and drills; incident lessons and action closure.

OTC-21 | PRACTICAL APPLICATION & DELIVERY

Industrial Fire Safety & Emergency Preparedness

PRACTICAL WORKSHOPS

Firewater readiness review

Use an illustrative inspection pack to identify unavailable equipment, overdue checks and escalation priorities.

Emergency tabletop

Walk through a fictional fuel leak and fire alarm, focusing on notification, evacuation, command roles and accountability.

PARTICIPANT TOOLS AND TAKEAWAYS

Fire protection readiness checklist; impairment/action register; emergency tabletop worksheet; drill debrief template.

HOW LEARNING IS DELIVERED AND ASSESSED

Facilitated explanations, worked examples, case discussions and small-group exercises. A short baseline check establishes starting knowledge; a closing knowledge check and practical review assess learning. Assessment can be adapted for operators, technicians or experienced engineers.

CUSTOMISATION AND CLIENT INPUTS

Site emergency plan and fire protection overview. Live firefighting or extinguisher demonstrations require an approved facility and competent emergency-service instructors.

The agenda is indicative. Final content, duration, batch size, language and delivery arrangements are agreed after a training-needs discussion. Online delivery uses document reviews, calculations, role-play and case exercises; physical demonstrations require separate site arrangements.

FACILITATOR

Prem Prakash Mishra | Mechanical engineer, advisor and corporate trainer. Brings 39 years of career experience across Kuwait Oil Company, IPCL and NTPC, spanning projects, commissioning, maintenance, reliability, asset integrity and industrial audits. Specialist inputs, where needed, are agreed in the proposal.

COMPLETION AND FOLLOW-UP

An Omtech Corporation participation or completion certificate may be provided under the agreed assessment arrangements. This is company training, not an accredited professional qualification or a guarantee of certification. Post-training support is available with scope and duration agreed in the proposal.
